

# 'Can do Better'

Convert this 'report-card' remark to:

"Excellent performance"

# Frustration:

The MARKS obtained do not justify the effort put in by students...  
*{or the **amount** invested by parents..}*

## Long hours

Students are forced to study for 10-14 hrs. daily thanks to the intense competition

## Recall ability

They tend to FORGET facts & figures inspite of repeated revisions, as recommended

## Distractions

Concentration span (specially while studying) has reduced considerably

# BRAIN potential..

What if the students are able to:

## Read Faster..

Complete their portion faster?  
**{they understand the plot etc. in novels even while reading them fast}**

## Remember easily..

RECALL facts & figures at will?  
**{The same Brain can recall songs after hearing them just a few times!}**

## Engage (whole) Brain..

Actively engage the Brain, thus increasing interest levels?  
**{movies, games, music are more fun}**

# Wow! Is this possible?

## Can we TRAIN the BRAIN to work more effectively?

*Well, this is precisely what  
we help them achieve -  
within just a few weeks !*

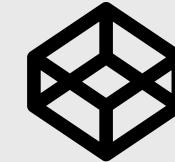

# While Studying, students :-

**READ text**

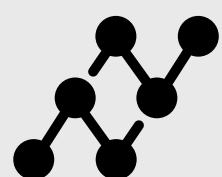

**Make NOTES, Understand**

**MEMORIZE them**

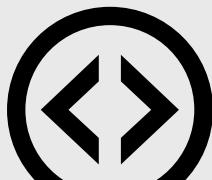

## Others can also help in:

**Reviewing previous Papers**

**HOPE - questions are repeated**

**PRAY - able to recall answers..  
...during Exam time**

# To Ace Exams - Learn steps # 1, 2, & 3

And this is what we  
help students with...

## **1: Save Reading Time**

Students can DOUBLE / Triple their reading speed WITH understanding

## **2: Save Notes making Time**

Convert 5-10 pages of Linear text to a Single Sheet 'Mind Map', {increasing understanding too}

## **3: Save Recalling Time**

Recall facts & figures by increasing the Power of remembering of the Brain

## **4: Save Revision Time**

Learn the scientific way to Revise - to put information in 'long term memory'

# Parents know..

The importance of equipping their children TODAY to be successful in the future..

## Population

The COMPETITION has increased substantially

## Resources

The COST of education is increasing regularly

## Future Ready

Traditional ways of studying - might not be enough

## Time

To invest in all round development & upskilling
